ABOUT

I am changing careers from the automotive industry to the design industry. With me, I bring my drive, dedication and natural curiosity that propelled me from a parts delivery driver to a professional Service Advisor. I made an impact on others lives by ensuring they received the best service possible, as well as a dependable car repaired at a price we both agreed on. I am excited to bring with me my vast wealth of knowledge on running a project smoothly and creative vision to the world of User Interface design.
